SFU MyProfessor

Description
This chrome extension's main feature will revolve around giving SFU students the ability to see teacher ratings from Rate My Professor directly on MySchedule to mitigate the time it takes to copy+paste professor names from MySchedule to RMF and vice-versa. This tool will give the privilege of easily seeing ratings when creating course schedules

Functional Requirements
Users must be able to easily see professors ratings, difficulty, would take again percentage, and number of ratings

User Stories
1. As a Student I want to see the professors overall rating and difficulty score to gauge the potential workload and teaching quality before enrolling
2. As a Student i want to view the "would take again" percentage to understand the overall sentiment and satisfaction of previous students
3. As a Student i want to see the total number of ratings to determine how reliable and representative the displayed scores actually are

Acceptance Criteria
- Display a numeric rating out of 5.0
- Color code the rating - Green for > 4.0; Red for < 2.5; Yellow for 3.9 < x > 2.6
- Display Difficulty
- Display N/A if no data is returned
- Display N/A if Professor name is "Staff" or "TBD"

Feature Breakdown (MoSCoW)

Priority	Feature
Must Have	• Professor Overall Ratings • Difficulty Rating
Should Have	• Number of ratings • Would take again percentage
Could Have	• Ratings color coding

Won't Have	• Direct link to Rate My Professor website
